

# MATERIALS

---

Quality furniture manufactured in Denmark based on proud traditions, design and strong craftsmanship for more than 60 years. We use only the best part of the wood in our production and despite using modern technology, our experienced cabinetmakers ensure that they keep to the traditional craft during the processing of the wood. The beautiful structure and natural qualities of the wood are retained throughout the process up to the finished tables from Haslev.

## TYPES OF WOOD

We offer our furniture in oak treated and untreated as well as beech treated and untreated.

## TREATMENT OF WOOD

Standard treatment options: oil nature, white pigmented oil, soap treated, clear lacquer. We offer special treatment on specific models on additional charge.

## THE VARIOUS TYPES EACH HAVE THEIR OWN CHARACTERISTICS AND APPEARANCE

Wood is a living material and it will always change as a result of the seasons and temperature fluctuations of the surroundings and changes in humidity. Therefore, you will find that it might swell and shrink over time.

Small knots, difference in colour, significant or insignificant growth rings in the wood as well as quarter sawn plates with markings are considered as a sign of authenticity not an error. Regardless of the wood type, we recommend that both treated and untreated wood is always soap or oil-treated so the wood does not dry out. If the wood dries out, it may crack. Lacquered wood does not require any maintenance.

## LINOLEUM AND LAMINATE

In addition to the different wood types and treatments, we work with linoleum and laminate in different colors – depending on the model.

Linoleum: soft white, graphite, folkstone light grey.  
Laminat: black, conifer dark green, pebble.
